Congress Large Cap Growth ETF Summary of Fair Value Disclosure at January 31, 2024 (Unaudited)

The Congress Large Cap Growth ETF (the "Fund") utilizes various methods to measure the fair value of its investments on a recurring basis. Accounting principles generally accepted in the United States of America ("U.S. GAAP") establish a hierarchy that prioritizes inputs to valuation methods. The three levels of inputs are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.
- Level 2 Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.
- Level 3 Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The following is a summary of the inputs used to value the Fund's investments as of January 31, 2024. See the Schedule of Investments for an industry breakout.

Congress Large Cap Growth ETF

	Level 1	Level 2		Level 3		<u>Total</u>
Assets:						
Common Stocks	\$ 84,403,451	\$	-	\$	_	\$ 84,403,451
Money Market Funds	838,806		-		-	838,806
Total Assets	\$ 85,242,257	\$	_	\$	_	\$ 85,242,257
